Summary

DevOps engineer with six years in Microsoft-centric shops. Deep on Azure and AKS Terraform, and Azure DevOps pipelines. Looking to move into a platform role at a smaller company.

Experience

DevOps Engineer III, Initrode Insurance (Chicago, IL), Oct 2019 - present

- Own the AKS platform for the claims processing suite: four clusters, about 200 services, mostly .NET. Handled the move from Azure Service Fabric to AKS in 2021.
- Terraform for all Azure resources (landing zones, AKS, Key Vault, networking). Sentinel policies for tagging and network rules.
- Azure DevOps pipelines for build and release; started piloting Flux for GitOps in 2024 on two clusters.
- Azure Monitor and Application Insights for telemetry; Grafana dashboards on top for the NOC. Helped define availability targets for the claims intake API.
- Key Vault for secrets with managed identities; wrote the internal guide on workload identity for AKS.
- Supported SOC 2 audit requests and HIPAA controls for the infrastructure layer.
- Rotational on-call, roughly one week in six.

Systems Engineer, Prestige Worldwide Media (Chicago, IL), Jun 2018 - Sep 2019

- Windows and Linux server administration, PowerShell automation, early Azure migration work.

Skills

Azure, AKS, Kubernetes, Terraform, Azure DevOps, Flux, Key Vault, Azure Monitor, Grafana, PowerShell, Python (scripting), C# (reading, not writing), SQL Server.

Certifications

Microsoft Certified: Azure Solutions Architect Expert (2022). CKA (2023).

Education

BS Computer Engineering, University of Illinois Chicago, 2018.
